

Put the Power of Podcasting to Work in your Classroom

FREE
30-day trial

NEW! K-Adult. Creating a podcast has never been easier. Teachers and students of any age can script, create, edit and publish **podcasts** all from the same simple interface in minutes. **Podium** is a PC-based application, designed specifically for the education market.

What is Podcasting?

Podcasting lets anybody with a microphone; a computer and an Internet connection publish audio broadcasts that can be listened to by people anywhere in the world. Because the barriers to entry are very low, podcasting is rapidly becoming a popular way for people to share audio broadcasts. Podcasts are free and can be automatically downloaded to portable media players, so they can be listened to whenever it's convenient.

RM Podium Offers:

- » A new way to present a **science project, book report** or any written piece
- » The only podcasting solution especially **designed for students and educators**
- » **Motivation** for students to become engaged in any lesson
- » English language learners a way to listen to their own progress as well as their teacher's instructions

» *Podcasting on a PC was hard. Now it is easy with a tool designed specifically for K-12 to enhance teaching and learning both in and beyond the classroom.*

Also Available

RM Tuff Cam, the ultra simple & child friendly 3 Mega-Pixel digital movie/ still camera.

NEW!
Multi-tracking capabilities

Students can listen and edit their pieces directly from the computer
